SUMMARY

Computer Science graduate (AI/ML) with hands-on experience in full-stack web development (MERN), data analytics, and machine learning. Proficient in Python, SQL, React, and Power BI. GATE 2025 qualified in Data Science & AI. Demonstrated ability to build scalable applications, design ETL pipelines, and deploy ML models for real-world forecasting and classification tasks.

TECHNICAL SKILLS

Languages: Python, JavaScript (Node.js), C, C++, HTML5, CSS3, SQL

Frameworks & Libraries: React.js, Express.js, Tailwind CSS, Bootstrap, Scikit-learn, Pandas, NumPy, NLTK, Streamlit

Databases: MongoDB, PostgreSQL, MySQL

Tools & Platforms: Git, GitHub, Power BI, Firebase, VS Code, Cisco Packet Tracer, REST APIs, ETL Pipelines

Concepts: Machine Learning, NLP, Data Analysis, Data Cleaning, Data Visualization, Statistical Analysis, CRUD Operations, Agile, SDLC, Computer Networks, Business Intelligence.

WORK EXPERIENCE

Web Development Intern | Cynotek Technology Solutions | Dehradun, India [Jul 2025 – Oct 2025]

- Built and deployed SmartSpend, a full-stack MERN application with secure CRUD operations, real-time data synchronization, and Firebase Authentication — enabling 100% verified-user access control.
- Developed interactive React + Tailwind CSS dashboards for expense tracking and category analytics, reducing manual reporting effort by ~40%.
- Optimized MongoDB schema and Express/Node.js query performance, improving average API response time and supporting persistent user sessions across devices.

AI/ML Virtual Intern | Edunet Foundation

(Shell-Edunet Skills4Future & TechSaksham – Microsoft & SAP) | Remote [Nov 2024 – Dec 2024]

- Completed project-based learning in AI technologies under industry mentors from Microsoft, SAP, AICTE, and Shell. Built and presented AI prototypes — an NLP chatbot (Microsoft SAP TechSaksham) and a Power BI energy dashboard (Shell Skills4Future) — to a panel of industry experts.
- Collaborated in group sessions applying ML concepts to real-world datasets, strengthening hands-on skills in model building and evaluation.

Network Engineer Trainee | National Informatics Centre (NIC) | Dehradun, India [Jan 2024]

- Configured and analysed LAN/WAN networking components including switching, routing, and VLANs, gaining hands-on experience at a government data centre.

PROJECTS

Sales Intelligence & Forecasting Platform | Python, PostgreSQL, Power BI, Scikit-learn [Jan 2026 – Present]

- Building a scalable ETL pipeline using Python (Pandas, NumPy) to clean, transform, and integrate multiple sales data sources into a PostgreSQL data warehouse.
- Designing interactive Power BI dashboards with KPIs to monitor sales trends, customer segmentation, and regional performance in real time.
- Implementing ML models (Scikit-learn) for sales forecasting and customer segmentation, targeting 20–30% improvement in forecast accuracy upon full deployment.
- Automating reporting workflows to deliver actionable insights to stakeholders, reducing manual data preparation time by an estimated 50%.

LUNA – AI Chatbot | Python, NLTK, Scikit-learn, Streamlit [Dec 2024 – Jan 2025]

- Designed and deployed LUNA (Logical User-friendly Notion Assistant) using NLP and Logistic Regression for intent classification, achieving accurate context-aware responses across 15+ intent categories.
- Built an interactive Streamlit interface enabling real-time human-computer interaction with low-latency response delivery.

PulseFeed – News Aggregator | *HTML, CSS, JavaScript, REST APIs*

[Apr 2025 – May 2025]

- Developed a responsive news aggregation platform integrating third-party REST APIs to deliver real-time articles, reports, and multimedia content for end users.

Energy Consumption Trend Analysis | *Power BI*

[Nov 2024]

- Designed interactive Power BI dashboards with KPIs to visualize energy consumption (gas, electricity, water) across buildings and cities, enabling data-driven decisions for stakeholders.
- Applied predictive modelling techniques to uncover hidden patterns and correlations, identifying opportunities for energy efficiency improvements.

EDUCATION

B.Tech – Computer Science & Engineering (AI & ML)

GB Pant Institute of Engineering & Technology | Pauri , Garhwal

[Aug 2020 – Jun 2024]

Aggregate: 72.2% | Specialization: Artificial Intelligence & Machine Learning

CERTIFICATIONS & ACHIEVEMENTS

- GATE 2025 – Data Science & Artificial Intelligence (DA): Qualified, demonstrating strong proficiency in data analytics, statistics, and ML.
- The Complete Web Development Bootcamp (Udemy, 2022): Full-stack web development covering HTML, CSS, JavaScript, React, Node.js, and MongoDB.
- Data Science Specialization (Coursera, 2024): Covered data analysis, visualization, feature engineering, and machine learning.
- Branch Coordinator, Student Activity Cell – GBPIET (Aug 2023 – Jun 2024): Led organization of academic seminars, cultural festivals, and community outreach programs, demonstrating leadership and event management skills.
